Software Solution for Successful Hospital Management

Key Features

- More than 150 Reports in total
- Variety of Census Reports for MCI purposes
- Designed with and for Doctors
- DOS based Printing of Bills
- Integration with Images and Pictures
- Seamlessly-integrated modules
- MIS & EMR
- Barcode enabled

•This is a successful solution for couple of medical colleges for the past 3 years

Software Architecture & Requirements

- Visual Basic 6.0
- SQL Server 2000 / 7.0
- Crystal Reports
- Client Server Architecture - Standard Server with Intel Xeon Processor, 1 GB RAM, 40 GB HDD, etc.
- **Windows NT/2000/2003 Server**
- Standard PC with Intel Celeron 2.0 GHz, 128 MB RAM, 20GB HDD, etc.
- **Windows 98 / 2000 / XP**

Module features

1. Front Office Point

- Generating Patient ID for new cases
- Registering Follow up Visits – Clinic wise
- Emergency Case Register
- Admission – Transfer – Discharge
- Census Reports

2. Clinic Point

- Capturing Medical Data of each case – Clinic wise
- Data capture at all stages from Day one to day of discharge
- Maintaining Medical Case History
- Reporting

3. Lab Service Point

- Report on Investigations prescribed for OP and IP cases
- This includes Microbiology, BioChemistry, Blood Bank, Pathology, CT Scan, X-Ray, Nuclear Medicine, etc.
- Daily report on IP cases for Billing purpose

4. Billing Point

- Billing for New Registrations, Investigations, etc. for OP

- Maintaining Optimum Stock Levels
- Tracking of complete cycle of Requisition – Quotation - Purchase Order – Receipt – Issue and Consumption
- Billing – OP, IP, Non-Patients
- Reports and Statements – Reports on Collections, Stock, Receipts, Issues, etc.

6. Blood Bank Point

- Donor Management
- Screening and Cross Matching
- Tracking of Request – Collection – Testing – Issue
- Component Generation & Inventory

7. Ward Management Point (Includes OT and ICU)

- Transfers and Discharge
- Information on Patient's Course in the Hospital – Daily Report
- Investigation Results – periodical
- Operation Notes – Discharge Summary – Nurse's Report
- Case Sheets for Procedure/Surgery –
Anesthesia – Perfusion – ICU – OT – Post & Pre Operative – etc.
- Drug intake
- Operation Theatre Scheduling

8. HR Point

- Employee Master
- Pay roll
- Performance Appraisal Tracking
- Statutory Statements

9. Inventory – Purchase and Stores (Medical & General)

- Maintaining Optimum Stock Levels
- Tracking of complete cycle of Requisition – Quotation - Purchase Order – Receipt –
Issue and Consumption
- Maintaining Sub Store stock levels
- Reports and Statements

10. Medical Records Point

- ICD Coding
- Maintaining complete Medical Case Records – OP and IP
- File Handling – Issues and Collection
- Census Reports & Registers
- Data Analysis & Statistics

11. Dietetics Point

- Meals Menu Management
- Calorie Chart
- IP Patient Consumption
- Tracking of Requisition – Kitchen Order – Supply – Intake
- Billing Report – Daily basis

12. Maintenance Point (Bio Medical, Electrical, PC)

- Equipment Register
- AMC Monitoring
- Insurance Details
- Tracking of Job Request – Order – Completion
- Maintenance Scheduling

13. Library Management Point

- Accession Register
- Lending and Return
- Membership Management
- OPAC
- Reports

14. Accounts Point

- Receivables and Payables

15. Housekeeping Point

- Linen management
- Job Order Monitoring
- Waste Management

16. CSSD Point

- Inventory of Sterile Equipment
- Work Load Monitoring
- Master Inventory

17. Fleet Management

- Vehicle Maintenance
- Fuel Consumption Monitoring
- Scheduling

18. Student Point

- Admissions
- Teaching
- Exams and Evaluation
- Mock Exams
- Hostel Bills

Implementation

- | | |
|-------------------------|--------------------|
| ➤ System Study | 5 days |
| ➤ Customization, if any | 25 days - 1 month |
| ➤ Implementation | 90 days - 3 months |
| ✓ Total | - 4 months |
